Construction Site Pollution Prevention Plan (CSPPP) - 1 acre or more

Project Name : _____

Project Address : _____

Tax Lot Number(s) : _____

Applicant (person legally responsible for permit): _____

Address: _____

Phone: _____ Email: _____ Fax: _____

CSPPP Contact (if different from applicant): _____

Address: _____

Phone: _____ Email: _____ Fax: _____

Applicant's CSPPP Inspector: _____

Qualifications (CPESC, CESCL, etc.): _____

Phone: _____ Email: _____ Fax: _____

24-Hour Emergency Contact: _____

Phone: _____ Email: _____ Fax: _____

What is the function of the construction activity? (Check One)

Residential Commercial Industrial Road Construction Linear Utility Other: _____

What other environmental permits are associated with this project?

DEQ 122-C USACE/DSL Joint Permit DEQ WQ-401 Other: _____

Estimated Timeline - Project Start Date: _____ Project Completion Date: _____

City of Turner – Staff Use Only:			
Project Number (City Designated): _____		Date Received: _____	
Fee Paid: \$ _____	Date: _____	Receipt Number: _____	

Section 1: Site Evaluation, Assessment, and Planning

Operators

Name & Contact Information	Area of Control

Provide a brief narrative describing the general scope of work and major phases of construction:

Checklist of mandatory map components:

- Contours, direction of run-off flow and approximate slopes before and after major grading activities
- Areas and timing of soil disturbances
- Areas that will not be disturbed
- Natural features to be protected and preserved (Mature trees, existing vegetation, etc.)
- Locations of major structural and non-structural BMPs identified in this CSPPP
- Locations and timing of stabilization measures
- Locations of storm drain inlets
- Locations of stormwater discharges to adjacent surface waters
- Locations of all Waters of the State, including wetlands
- Standard details and notes for all structural BMPs listed in section 3 & 4

Attach drawings, details, and notes as appropriate.

Section 2: Erosion and Sediment Control

Description of methods to protect and preserve natural features (features identified in Section 1 – Map Components):

Soil Type:

Slope Description:

Temporary Stabilization prior to Final Stabilization, Straw, Mulch, Seed, etc:

Perimeter Controls and Sediment Barriers (Straw Wattles, Compost Socks, Sediment Fence, etc.):

Stormwater Run-off Control and Sediment Retention. (Diversion Ditch, Sediment Pond, Storage Basins, etc.):

Inlet Protection (Filter Fabric Inserts, Biobags, Compost Socks, etc.):

Construction Entrance/Exit:

Final Stabilization:

Section 3: Good Housekeeping

Describe waste management on site (trash disposal, sanitary waste, recycling, and material handling):

Material and Staging Area:

Contained Material Washout Area (Concrete, Paint, Drywall mud, etc.):

Equipment/Vehicle fueling and Maintenance Practices:

Spill Prevention and Control:

Description of Receiving Waters and associated 303(d) or Total Maximum Daily Load Listings:
(i.e. Receiving Water: Willamette River, TMDL listed for Bacteria, Mercury, and Temperature)

Section 4: Inspections, Record Keeping, and Certification

Provide and maintain the following documents throughout the duration of the project:

- CSPPP Inspection Reports – Identifies areas of concern (storm inlets, slopes, etc.) and current condition of best management practices.
- Corrective Action Log – Identifies specific deficiencies on site and steps taken to provide adequate erosion and sediment control.
- CSPPP Changes Log – Identify components of CSPPP that were changed and provide justification for amendment.

Note: 0.5 cubic feet or more of material off site is a violation of the ordinance

You must request a pre-construction erosion control inspection prior to disturbing soil on site.

Required Conditions

- | | |
|----|--|
| 1. | Inspect and maintain the erosion control measures regularly identified to ensure intended function. Once every 4 days or within 24 hours of a 1/2" storm event (0.5 inches of rain in 24 hours). |
| 2. | Loose soil is to be contained to the project site and is not allowed in the street or adjacent property. |
| 3. | The project must be stabilized at the end of each workday, ensuring no sediment is transferred off site. |
| 4. | Construction material is prohibited from being buried on site. |
| 5. | A vegetative buffer must be maintained for projects adjacent to local waterways or wetlands. |
| 6. | All temporary erosion control measures must be removed once final stabilization is achieved. |
| 7. | Every project is subject to the conditions and penalties described in Ordinance TRC 8.03 (City of Turner Erosion Control Ordinance) |

A final stabilization inspection will be required prior to a final building inspection.

Allowing dirt, mud, loose soil to be tracked, washed, or dumped on the street results in potential contamination of local waterways and groundwater. Erosion control is a requirement of the City of Turner National Pollutant Discharge Elimination System (NPDES) permit issued by the Department of Environmental Quality. Accumulations of eroded material in local waterways can result in elevated mercury levels in fish and unhealthy levels of other heavy metals in the waterway. Muddy water can bury spawning grounds and make it difficult for fish to breathe, see predators, or feed. Heavy sediments in the water can lead to increased water temperatures.

Certification and Notification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons managing the system, or those persons directly responsible for gathering the information, the information submitted is; to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

Applicant signature on the form indicates that you have read this page and agree to adhere to the required conditions above for all work done in this site.
